EXPERIENCE

Software Development Engineer III

September 2021 - Present

PwC India

Kolkata, India

- Orchestrated three system migrations to AWS, enabling the processing of over 16 million webpages daily and providing organizations with improved cloud infrastructure capabilities while maintaining backward compatibility for user applications
- Extracted over 40 distinct contextual signals from raw HTML of crawled webpages, including webpage category and product details; processed upwards of 9 million URLs daily to enhance personalized advertising strategies
- Engineered and deployed contextual signals leveraged by over 30 cross-functional teams; directly contributed to generating \$2 million in revenue within the first nine months through enhanced ad targeting strategies
- Implemented cron jobs for optimized resource utilization, resulting in estimated annual savings of \$1.32 million and reduced latency by 19%
- Created an automation suite of ~ 600 test cases for an Indirect Tax Project
- Created test automation ROIs, estimation templates, reducing test cycle times by 25%, saving \$100K annually, and boosting script reusability by 40%

PROJECTS

Contest Arena | *HTML, CSS, React.js, NPM* | [GitHub Link](#)

- Designed and developed a web application used by over 500 users during initial testing to view past, live, and upcoming contests, retrieve rankings, submissions, and solve problems dynamically
- Achieved a 100% reduction in page reloads by implementing a Single Page Application (SPA) architecture, improving user experience and efficiency
- Implemented backend APIs using PHP (Slim Framework) and optimized database queries in MySQL, achieving a 35% improvement in data retrieval times for contest details and rankings
- Deployed the project on Heroku and AWS, maintaining 99.9% uptime during live tests and ensuring scalability for up to 1,000 concurrent users

POSIX Compatible Shell | *C++* | [GitHub Link](#)

- Engineered a POSIX-compatible interactive shell that executed over 50 standard Linux commands and custom-defined functions, enhancing command execution efficiency by streamlining process management functionalities like Redirection and Piping

EDUCATION

Heritage Institute of Technology

August 2021

Bachelor of Technology in Computer Science & Engineering

ACHIEVEMENTS

- Knowledge Accelerator Award by PwC India
- Territory Spot Award by PwC India
- Extra Miler Award by PwC India
- Client Champion Award by PwC India
- CodeChef Snackdown November 2019 Pre - Elimination Round Rank - 526

TECHNICAL SKILLS

Languages: C++, Python, Java, C#, JavaScript, TypeScript, Golang, Kotlin, SQL

Frameworks: React.js, Angular.js, Node.js, Next.js, Django, Flask, JUnit, FastAPI

Automation Frameworks: Playwright, Cypress, Jest & Selenium

Databases: Redis, MySQL, MongoDB, GraphQL, PostgreSQL & Cassandra

Performance Engineering Tools: JMeter & Loadrunner

API Tools: Postman, SoapUI, CA DevTest & Hoppscotch

Domains: Payments (ISO 20022), Banking, Finance, Insurance & Indirect Tax

Others: System Design (HLD & LLD), Salesforce, Microsoft Dynamics 365, SAP, LaTeX, Amazon Web Services
