EXPERIENCE

Software Development Engineer

September 2021 - Present

PwC India

Kolkata, India

- Orchestrated three system migrations to AWS, enabling the processing of over 16 million webpages daily and providing organizations with improved cloud infrastructure capabilities while maintaining backward compatibility for user applications
- Engineered core backend components for an internal LLM-powered enterprise assistant integrating with SharePoint and internal knowledge repositories
- Optimized prompt templates, context window handling and retrieval ranking, improving answer relevance by 12–15% in internal human-evaluated benchmarks
- Improved response latency by 25% through caching strategies and async request handling; scaled to support 30k+ queries/month.
- Built monitoring dashboards and evaluation harnesses to track hallucination rates, token usage, latency and user feedback signals for continuous model tuning.
- Designed and implemented an automated test suite of ~600 end-to-end and integration test cases, integrated with CI/CD workflows to ensure deterministic test execution and production-grade release stability
- Created test automation ROIs, estimation templates, reducing test cycle times by 25%, and boosting script reusability by 40%

PROJECTS

Contest Arena | *HTML, CSS, React.js, NPM* | [GitHub Link](#)

- Built a contest platform used by 500+ users to browse contests, rankings, and submissions
- Eliminated page reloads by implementing a Single Page Application (SPA)
- Developed PHP (Slim) APIs and tuned MySQL queries, improving data retrieval latency by 35%
- Deployed on Heroku and AWS with 99.9% uptime, scaling to 1,000 concurrent users

Distributed Rate Limiter | *TypeScript, Node.js, Redis, Docker* | [GitHub Link](#)

- Built a distributed rate-limiting service in TypeScript using Redis as the centralized store
- Applied atomic rate limiting via Redis Lua scripts for concurrent workloads
- Enhanced Redis pipelining to reduce network calls by ~3x and lower p95 latency to ~3ms
- Containerized the service using Docker for consistent local and production deployments
- Load-tested with concurrent traffic achieving ~60k req/s per instance while maintaining enforcement accuracy

EDUCATION

Heritage Institute of Technology

August 2021

Bachelor of Technology in Computer Science & Engineering

ACHIEVEMENTS & CERTIFICATIONS

- Knowledge Accelerator, Territory Spot, Extra Miler, Client Champion Awards by PwC India
- ISTQB Foundation Level Tester, Microsoft Azure Cloud Fundamentals (AZ - 900), Microsoft Azure Data Fundamentals (DP - 900), QuerySurge Certified ETL Tester

TECHNICAL SKILLS

Languages: C++, Python, Java, TypeScript, JavaScript, SQL

Frameworks: React.js, Angular.js, Node.js, Next.js, Playwright, Cypress, Selenium

Databases: Redis, MySQL, MongoDB, GraphQL, PostgreSQL, S3

Others: System Design, Design Patterns, Docker, $\text{\LaTeX}$, AWS
